# What I have learnt In AkiraChix

I joined Akirachix on the 1st of February 2025, and right now I am 26 days old in AkiraChix . I am not the same from the day I came because I have learnt a lot of new things and I would love to share it with you. Below are the lessons that we learn and I am going to summarize them individually and tell you what I have learnt from them.

## Ux Research

- I have learnt how to do a case study on a product or company.
- I have learnt what a user experience is as we gave real scenarios in class.
- I have learnt to work in groups as most of the case study we do we present it as a group.
- I have learn how that before a product is launched to be used a testing must be done to check if the product is accepted well by the users
- I have learnt why we do research and how the research should be done.

## Web Development

- I have learnt what HTML is
- I have learnt about tags and elements and how we should use them
- I have learn how to design a table
